

The revision of ISO 9001: 2015

Changes and implications

The revision of ISO 9001: 2015

- As with all management systems standards ISO organization reviews periodically all the issued standards.
- The review process ensures that the standard continues to satisfy the needs and the requirements of the Quality Management Systems.

Reasons for the revision

- Changes in technology and at the environmental practices.
- Ability to easily integrate other management systems (such as ISO 14001, etc).
- Necessity to simplify the understanding of the standard and make it easier to implement.
- Strengthen the capacity of organizations to improve their environmental performance

Basic changes

1. 'Emphasis on the involvement and support of top management.

- ✓ Top Management responsibility on the effectiveness of the QMS
- ✓ Detect internal & external factors affecting the operation of the company

Basic changes

2. Emphasis on the needs and expectations of the interested parties.
